PROFILE

Digital Innovator and software developer who turns ideas into practical digital products. Combines product thinking, collaborative leadership and clear communication with experience in web and mobile development, AI integration and quality assurance. Values teamwork, reliable delivery and solutions shaped around user needs.

PROFESSIONAL EXPERIENCE

Full-Stack, Mobile & AI Developer
Parceria360, Maputo | 2026 - Present
Develop web and mobile features for startup management using Laravel, Vue.js, React Native and Expo; integrate conversational AI with project, task and cost data. Collaborate on requirements and delivery, communicate findings and coordinate validation of functionality, AI responses and data consistency.

Co-Founder | Product & Technology Lead
Seven Networks, Maputo | May 2026 - Present
Lead architecture, development, testing and deployments; evolve XiTikando and contribute to Zimbora planning. Coordinate technical priorities and infrastructure, communicate product decisions and collaborate across product delivery.

IT Specialist | Software Testing & QA
MozPick, Maputo | Mar - Sep 2026
Performed functional testing, documented defects and validated fixes. Supported user access and troubleshooting; communicated issues clearly and collaborated with colleagues to coordinate resolution and release quality.

President | DMI Student Council (NEDMI)
Eduardo Mondlane University | Apr 2024 - Aug 2026
Represented students and led coordination of academic, scientific and innovation initiatives. Communicated student priorities, collaborated with faculty leadership and supported UEM outreach events.

TECHNOLOGIES & TOOLS

Backend: PHP / Laravel, Java, REST APIs
Frontend & Mobile: JavaScript, Vue.js, React, React Native, Expo, HTML / CSS
Data & AI: MySQL / SQL, LLM APIs, AI-assisted workflows
Operations & Design: Git / GitHub, Linux / Nginx, hosting, deployment, software testing / QA, Figma

PROJECTS (CONTINUED)

Supply Centre Management | Desktop
Complete application managing users, clients, meter readings, billing, payments and internal expenses. Integrates frontend and backend around operational needs and an intuitive interface.
Project / demo link: [to be added]

Electronic Equipment | Online Sales
Responsive e-commerce platform with M-Pesa, E-Mola and bank card payment methods, designed around convenient browsing, secure transactions and an efficient shopping process.
Project / demo link: [to be added]

TransCarga | Transport Management
Academic Java project using data structures and object-oriented programming: generic linked queue, vehicle records and load-management entities.
Project / demo link: [to be added]

Zimbora | Digital Product Planning
Participated in product scoping and technical planning within Seven Networks.
Project / demo link: [to be added]

COMPETITIONS & ACHIEVEMENTS

Moza xLab - UEM Hackathon | October 2026
2nd place. Co-built Kawash, a car-wash discovery and booking concept, with collaborative product development.
Zindi | Maputo Mobility Prediction Hackathon | October 2025
4th place among 30 teams in a mobility prediction competition.
Result / participation evidence: [links to be added]

CERTIFICATIONS | ALIBABA CLOUD ACADEMY

August 2025
Big Data: MySQL for Beginners - Basic Queries
Cloud Computing: MySQL Database Concepts and Operations
Credential verification: [links to be added]

PORTFOLIO & LINK STATUS

Project URLs above were supplied by the candidate; availability could not be independently confirmed. Other project, competition and certificate links remain pending.
Planned portfolio: a Vercel-hosted gallery with screenshots, project descriptions, technologies, responsibilities and demonstrations. Gallery URL: [to be added].
